

## MERRY CHRISTMAS

To all of our loyal customers of Allcast, both those who have been buying tanks from us for years and our new customers who joined us this past year, **A HEARTY THANKYOU** for your custom.

We have continued to grow the business in 2010 and have had very encouraging feedback on the quality of our products and service.

Bryan Collins started as our sales and marketing man in February of this year. He will have met many of you and next year will meet many more. He is a hard worker with a friendly smile and is out there to help you.

Tania is our front person who you would have all spoken to on the phone. She organizes production and delivery and you will not find a more capable coordinator.

One thing we would like improved on next year is the weather, it's been so frustrating for so many of the tradies this year.

The team at Allcast wishes you all a very happy Christmas and holiday season and we look forward to talking with you again in 2011.

Dave Bissett  
Director

## PRESENT CORNER

The Earthsafe D10 single concrete tank is our aerated treatment system which uses natural biological processes to treat waste water through a series of clarifiers.

The systems weighs 4.5Tonne, measures 2.5m in diameter, 2.25m in height and comes complete with electrical control box mounted on the lid.

The units are available in 3 discharge quality levels; standard, advanced secondary and advanced secondary with nutrient reduction all of which are suitable for residential applications and are Queensland approved.

Please contact Allcast Precast for your free quote and information sheet.

## JINGLE DOWN THE DRAIN....

As this is the festive season and most of us will be holidaying and over indulging on good food and wine, take note where most of it is really going. Allcast Precast can help you out with their single concrete treatment systems and concrete septic tanks.

With our waste water systems tested and accredited by the Department of Natural Resources in Queensland and our septic tanks tested by SAI Global you are assured of a quality product. As production and developments will spring into action early next year we can provide you with complete waste water and water tank packages to your requirements welcoming you into the New Year.

## DECK THE HALLS WITH ALLCAST PRECAST

Allcast Precast has been moving forward in the past three months even with the poor weather we have been having recently.

The popularity of our heavy duty 23,000Lt concrete tanks has been huge and for this reason we took commission of another steel mould in September allowing us to keep up with the demand in both residential and commercial developments.

We have successfully completed four major commercial developments in as many months throughout Queensland that included multiple heavy duty retention/ detention water storage tanks for townhouse developments (see photo's below)

In October we had a site at the Sunshine Coast Home Show and Lifestyle Expo and even with the average weather we had, our exhibit stood tall and we were able to get some great enquiries and sales. With the size of our site we were only able to have our 6,200Lt squat water tank and a few smaller concrete products however there was still a lot of interest and once again our concrete dog bowls proved very popular!

Our website development is going really well and looking great and we are now in the final stages of designing and updating before releasing to the public this month. Hopefully an early Christmas present for everyone!

On a personal note we would also like to welcome a new addition to the Allcast team and congratulate Jarrod and Renee Bissett on the arrival of their baby boy Levi born In October.

Our office will be closed from the 23<sup>rd</sup> December and we will re-open on the 10<sup>th</sup> of January.

Retention/ Detention tanks—Yeppoon

138,000Lt storage—Murarrie

188,000Lt water storage—Petrie

## GIFT WRAP NEWS:

Christmas Island, located approx. 2600Km North West of Perth, has a mean annual rainfall of 1930mm. It is also located on the edge of the Java trench, Indian Ocean's deepest point.  
Merry Christmas Island!
